

### **Moderator focus group questions**

- 1) Do you use criteria for Clinical Prediction Rules (CPR) already?
- 2) Do you document CPRs in the medical notes currently?
- 3) Would you use a CPR if available in the EHR?
- 4) Would this type of EHR tool support workflow?
- 5) What would motivate you to use a CPR tool?
- 6) Do you think a tool can have a significant impact on clinical management if implemented into EHR?
- 7) How do you feel about the admission rates for (insert disease or diagnosis)?
- 8) Would a CPR help reduce the rates of (insert disease or diagnosis)?
- 9) Where would be the best place to implement the (insert disease or diagnosis) tool in the clinical workflow?
- 10) Can you name possible triggers (i.e. reason for visit, chief complaint, and/or orders) for the tool?
